

ECO-FRIENDLY LIMESCALE PROTECTION FOR RESIDENTIAL HOMES AND POOLS

www.hydroflow-usa.com

HydroFLOW induces a robust yet harmless signal of 150kHz throughout your plumbing system.

- Adds no chemicals to the water.
- Environmentally friendly, does not use salt.
- Requires no maintenance.
- Prevents limescale and biofilm accumulation and removes existing buildup.
- Cuts heating costs, conserves energy and extends equipment life.
- Five-year warranty.

Dan K.

The right decision

I was worried I would have to pay \$1000s for a water softener. I decided to give this a try and purchased an *HydroFLOW Pearl Plus* and it's working great.

Samantha L.

Perfect

I was looking for a product like this. I tried some other product that I had to wrap wires around the pipe and it did not work very well. I've been running *HydroFLOW* for 3 months and it has descaled my entire plumbing system.

Roxanne K.

Wish I had bought the next model up.

I don't think Pearl model is strong enough to treat my entire home. I wish I had bought the *HydroFLOW Pearl Plus* instead.

Alicia H.

Hard water problems gone

We bought our *HydroFLOW* device when we bought our new house and we have zero hard water problems. So glad we tried this.

Brittany L.

HS40 installed on pool

Used an *hs40* to help control algae and give us the ability to use less chemicals in our swimming pool. I would say since we started using it a month ago we have reduced our chemicals by 50% and will probably try using even less.

HydroFLOW Pearl Plus

- Fits pipes up to 1.5" outer diameter.
- Designed to protect standard size homes from the harmful effects of scale.
- The electric signal deactivates algae and bacteria and helps prevent corrosion.

Additional Products

HydroFLOW Pearl

- Fits pipes up to 1" outer diameter.
- Designed to protect a single piece of equipment, such as a tankless water heater, from the effects of scale.
- The electric signal deactivates algae and bacteria and helps prevent corrosion.

HydroFLOW hs40

- Fits pipes up to 2.5" outer diameter.
- Designed to protect large homes, pools and spas from the destructive effects of scale and biofilm.
- The electric signal deactivates algae and bacteria and helps prevent corrosion.

FROM BOILERS TO COOLING TOWERS

HydroFLOW units are installed all over the world in a wide variety of applications and industries to treat scaling, biofilm and filtration issues. Check out our website for more information: www.hydroflow-usa.com

- From homes to heavy industry
- From spas to steel mills
- Suitable for any pipe material
- From 1" to 108" outer pipe diameter
